3. Click text to columns.
4. Select Delimited and click Next
5. Tick other and type - in the box.
6. Click Next, then Click Finish.

Scanned with OKEN Scanner

Output :

Name	City.
Archana	Bangalore
Pooja	Chennai
Ravi	Trichy.

Remember:

(-) means split wherever a hyphen appears.
(,) means split whereever a comma appears
(Space) means split whereever a space appears.

Name manage

What is Name manager :

Name manager is used to create, edit delete and manage names assigned to cell or ranges.

Step to use Name manager

1. Select the cell or range, for example A1:A5
2. Go to the Formulas tab.
3. Click Name manager.
4. Create New.
5. Type a name, for example Sales
6. Check the cell range it refers to
7. Click ok then close.

Now, Instead of typing:

=SUM(A1:A3)

You can type:

=SUM(Sales).

Scanned with OKEN Scanner

Repeat for the other names.

Average
Max
Min
Count

Data Validation:

Data Validation is used to control what type of data a user can enter in a cell

Steps:

Select the cell or cells
Go to the Data tab
Click Data validation
Under allow, select list
In source type male, Female
Click ok.

Example:

Age 18 to 60 allow used to it

select the cells.
Data -> Data Validation
Allow : whole number
Data : Between
Minimum : 18
Maximum : 60
Click ok.

If you enter 25 accept. and 15 enter reject the cells if the error alert is enabled.
