If and aggregate function

SUMIFS (sum_range, criteria_range1, criteria1, [criteria_range2, criteria2], [criteria_range3, criteria3]...)

Example
SYNTAX = SUMIFS (G12:G121, E2:E21, ^{marketing.} [E16], E2:E21, "N")

Define: SUMIFS = Add Values based on two or more conditions

AVERAGEIFS: Define

Averageifs is an excel function used to find the average of numbers that meet multiple conditions

SYNTAX:
= AVERAGEIFS (average_range, criteria_range1, criteria1, criteria_range2)

Example = AVERAGEIFS (G12:G121, F2:F21, F17, G12:G121, 10000)

Define COUNTIFS

= COUNTIFS (count the number of cells that meet multiple conditions)

SYNTAX:
= COUNTIFS (criteria - range 1, criteria, criteria - range 2, criteria 2)

Example:

= COUNTIFS (B2:B10, "Marketing", C2:C10, ">15000")
