## Sort and Filter

There is a data cells to change the order wise arrange the alphabetical.

Home → Sort & Filter

Sort A to Z

Sort Z to A

Smallest to largest

largest to smallest.

Example:

| Name | Salary |
|---|---|
| Ravi | 25,000 |
| Arun | 15,000 |
| kumar | 30,000 |

salary Smallest to largest Sort

| Name | Salary |
|---|---|
| Arun | 15,000 |
| Ravi | 25,000 |
| kumar | 30,000 |

Sort Steps:

1. Data table-la oru cell select pi
2. Data tab: click it
3. Sort A to Z or Sort Z to A click on.

After stepe

Scanned with OKEN Scanner

# Solver Filter

15/10/2016

Display other north or R&D department data?

Turn on filtering for the select cells
the data Filtering the only N and R&D
Select Click on the advanced options for
filtering using complex.

Advance Filter

Action
- Filter the list, inplace

List range → Data to be select
Criteria range → Data Filter the list
Specific range
Click. ok

## Basic Solver

| Particulars | Item | Cost | total |
|---|---|---|---|
| Jeans | 1 | 850 | 1343 |
| Shirt | 0 | 295 | 161 |
| T-Shirt | 0 | 200 | 74 |
| Shoes | 0 | 475 | 419 |
| | | grand total | 2000 |

Gift voucher 2000

Select total value grand total = Sum(D2:D5)
go to the solver parameters Select Objective:
Select $D$6.
To: Value of: 2000
By changing variable cells: select item values.

Select a Solving method selecting GRG Nonlinear option

Click on the Solve the result is

| particulars | item | cost | total |
|---|---|---|---|
| Jeans | 01.53117 | 850 | 1343.998512 |
| Shirt | 0.54876 | 295 | 161.8843382 |
| Shorts | 0.37204 | 200 | 74.40822291 |
| Shoes | 0.8836 | 475 | 419.7088778 |
| | | grand total | 2000 |

## Max solver

| Product | Quantity | profit per product | overall profit |
|---|---|---|---|
| Product A | 0 | 10 | =B2*C2 0 |
| Product B | 0 | 16 | 0 |
| Product C | 0 | 33 | 0 |
| Total | =sum(B2:B4) | MOP | =sum(D2:D4) 0 |

Select product A, B, C values (=sum) Formula

Calculation

Maximum overall profit A, B, C value (= sum) formulas

Calculation

constraints

Atleast 100 product A should be made

Atleast 20 product B should be made

Atleast 50 product ~~50~~ should be made

A total of 350 product should be made

## Solver parameters

select the overall profit total -> set objectives:

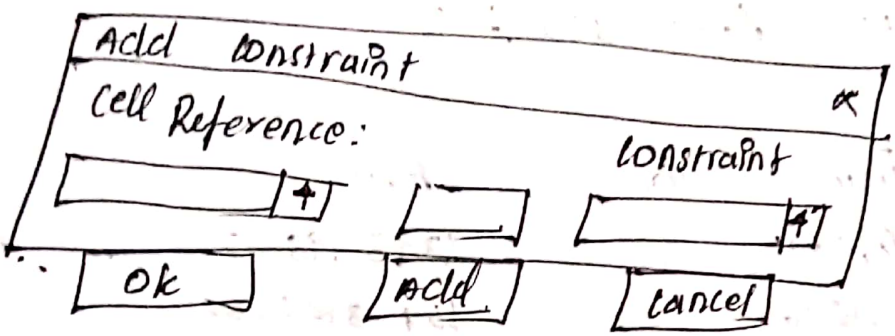

By changing value cell: Quantity cells

Select.

Subject to the contraints:

Scanned with OKEN Scanner

Select add

Select the cell of reference: =$B$2

>= ~~100~~ Contraint 100 Just Add

Click on it. Same process, Add the all product on the contraint table

Select a solving method: Simplex LP

Click on it Solve.

Result:

| Product | Quantity | PPP | Overall profit |
|---|---|---|---|
| A | 100 | 10 | 1000 |
| B | 20 | 16 | 320 |
| C | 230 | 33 | 7590 |
| Total | 350 | | 8910 |

Overall profit = 8910
